

# PORTABLE GAS CHARGING UNIT

- ✓ Fast Fill Times
- ✓ Powered by Compressed Gas from Compressor or Cylinder
- ✓ Lightweight and Portable

## Application Example: Hydrogen-powered UAV's

Hydrogen fuel cells enable UAV's to fly further than a battery-powered equivalent.

© Intelligent Energy, 2023

Currently being used for Oil & Gas pipeline inspection projects, the IE-SOAR 2.4kW fuel cell module from Haskel's customer, Intelligent Energy, flies for 2 hours and **can refuel in just a couple of minutes using Haskel's air driven gas booster system!**
